

# Wartungsheft · Service book

Maintenance history for vehicles in Switzerland – print and fill in

## Vehicle details

|                       |  |                    |  |
|-----------------------|--|--------------------|--|
| Make and model        |  | Number plate       |  |
| Chassis number (VIN)  |  | First registration |  |
| Owner (name, address) |  |                    |  |

One line per service, even for small jobs. Together with invoices, the mileage entries help reconstruct the maintenance history. Keep invoices separately.

Service history (1/3)

| Date | Mileage | Work / service | Garage | Invoice no. | Cost (CHF) | Next due |
|------|---------|----------------|--------|-------------|------------|----------|
|      |         |                |        |             |            |          |
|      |         |                |        |             |            |          |
|      |         |                |        |             |            |          |
|      |         |                |        |             |            |          |
|      |         |                |        |             |            |          |
|      |         |                |        |             |            |          |
|      |         |                |        |             |            |          |
|      |         |                |        |             |            |          |
|      |         |                |        |             |            |          |
|      |         |                |        |             |            |          |
|      |         |                |        |             |            |          |
|      |         |                |        |             |            |          |
|      |         |                |        |             |            |          |

One line per service, even for small jobs. Together with invoices, the mileage entries help reconstruct the maintenance history. Keep invoices separately.

## Service history (2/3)

| Date | Mileage | Work / service | Garage | Invoice no. | Cost (CHF) | Next due |
|------|---------|----------------|--------|-------------|------------|----------|
|      |         |                |        |             |            |          |
|      |         |                |        |             |            |          |
|      |         |                |        |             |            |          |
|      |         |                |        |             |            |          |
|      |         |                |        |             |            |          |
|      |         |                |        |             |            |          |
|      |         |                |        |             |            |          |
|      |         |                |        |             |            |          |
|      |         |                |        |             |            |          |
|      |         |                |        |             |            |          |
|      |         |                |        |             |            |          |
|      |         |                |        |             |            |          |
|      |         |                |        |             |            |          |

One line per service, even for small jobs. Together with invoices, the mileage entries help reconstruct the maintenance history. Keep invoices separately.

## Service history (3/3)

| Date | Mileage | Work / service | Garage | Invoice no. | Cost (CHF) | Next due |
|------|---------|----------------|--------|-------------|------------|----------|
|      |         |                |        |             |            |          |
|      |         |                |        |             |            |          |
|      |         |                |        |             |            |          |
|      |         |                |        |             |            |          |
|      |         |                |        |             |            |          |
|      |         |                |        |             |            |          |
|      |         |                |        |             |            |          |
|      |         |                |        |             |            |          |
|      |         |                |        |             |            |          |
|      |         |                |        |             |            |          |
|      |         |                |        |             |            |          |
|      |         |                |        |             |            |          |
|      |         |                |        |             |            |          |

One line per service, even for small jobs. Together with invoices, the mileage entries help reconstruct the maintenance history. Keep invoices separately.

Maintenance plan for this vehicle

| Work           | Interval per manufacturer            | Last completed | Next due |
|----------------|--------------------------------------|----------------|----------|
| Oil and filter |                                      |                |          |
| Brakes         |                                      |                |          |
| Tyres          |                                      |                |          |
| Other work     |                                      |                |          |
| MFK            | According to vehicle type and notice |                |          |
